

A good place to learn?

Annotate this picture by drawing and writing what you think about its various aspects.

What are the strengths and weaknesses of the space? What do you notice about the environmental conditions, such as light, decoration, acoustics? What do you think about the organisation and flexibility of the space, including the possibility for student collaboration? Any comments on resources such as IWBs, PCs, writing surfaces?

Bad.

IS THIS EFFICIENT?

NOT FLEXIBLE.

Too small

Storage

Picasso

X

Good

Plenty natural light

ZONAL

Does the room need a decant / storage room to support

Writing walls not accessible

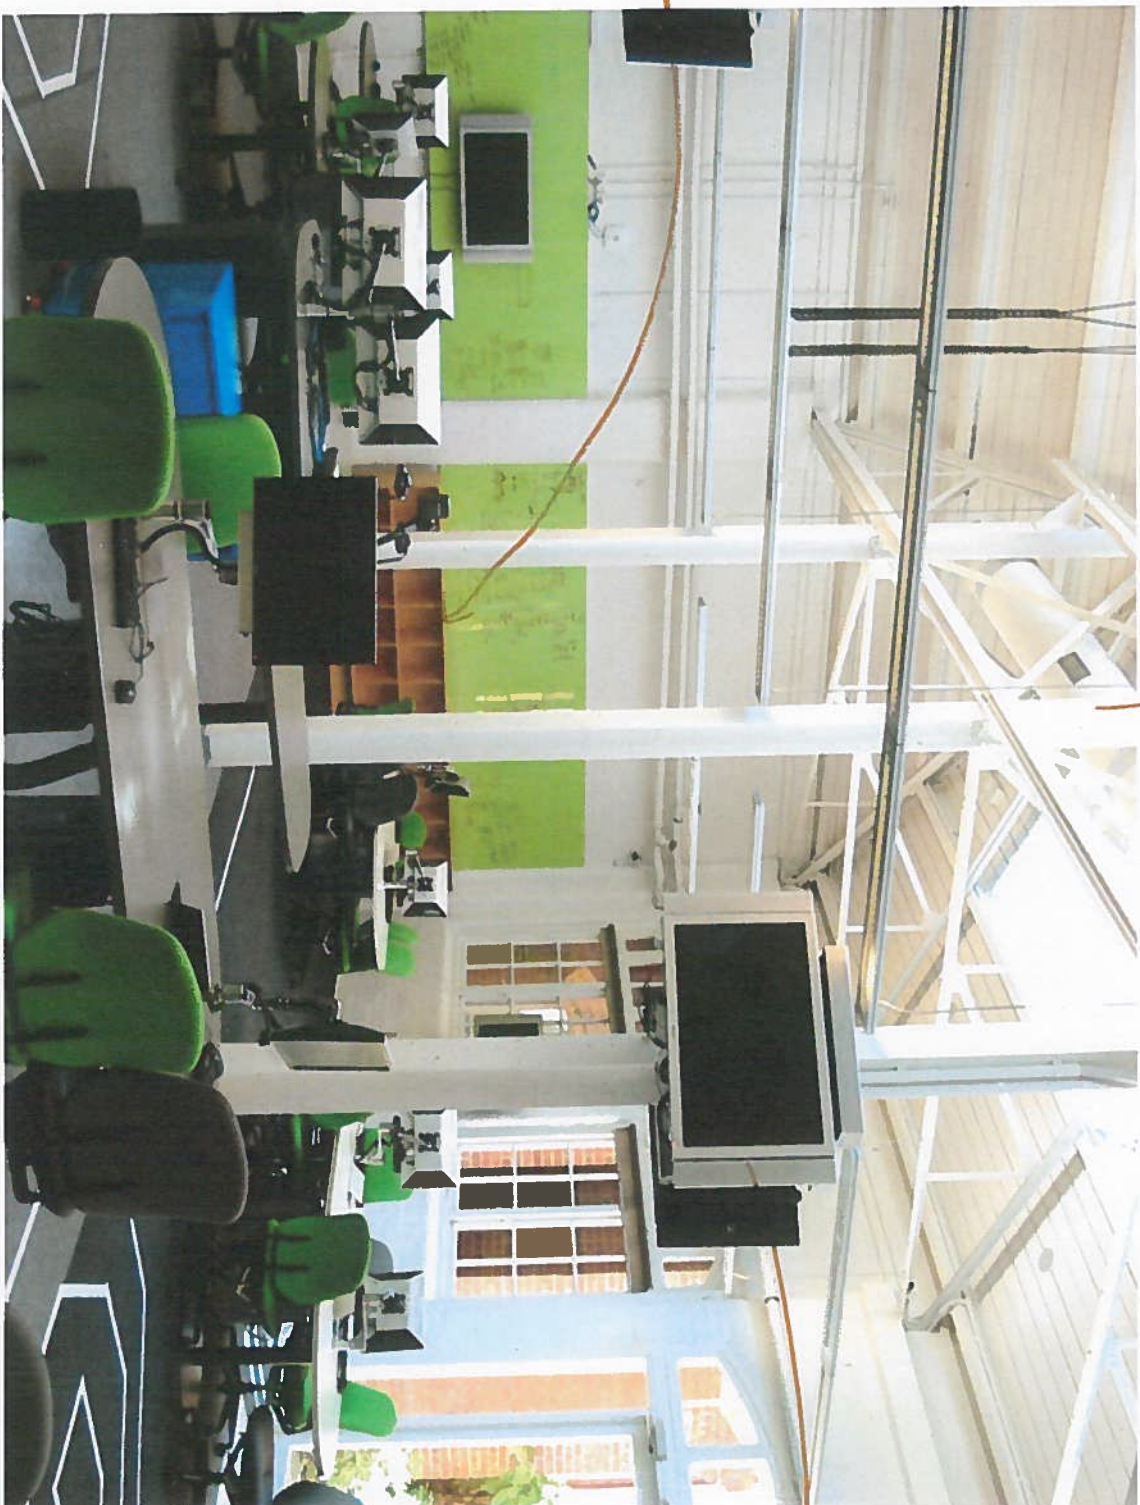

Wheeled
needs to be clever

Storage "Temporary"?
for coats, bags

Teaching kit - management of timetabling

Need space for set up / careful planned scheduling

Type of space for longer session → takes time

columns can disrupt

Should create a space for people to bring own technology
Laptops Tablets

Uni would need to support this

Flexibility comes from different activities

Does not appear very flexible

Bigger & flexible is more ideal

Can't do anything in great detail
↓
Could the teacher be filmed?

Acoustics? - Open door to external space

Daylight ~~important~~ essential
to services

Some specialist spaces
will be required.

Acoustics
in large space

No power on desks

Not enough writing
surfaces

Ventilation / Extraction
important

Not suitable for
laboratory work

Large
lectern

Too many screens

No space for equipment

Directional cameras

Yellow!

Students have to face away from academic to see screens. Communication?

PC's block view so not ideal for group work.

Small.
