

One-year Finance & GPPS IT Student Placements 2015-2016

One of the world's leading pharmaceutical companies, AstraZeneca is offering a one-year Computer Science undergraduate industrial trainee placement within the Finance and Global Product and Portfolio Strategy IT (F&GPPS IT) function at our Cambridge site.

You will be given the opportunity to support our finance and GPPS colleagues by undertaking small scale, agile application development and partnering with our Business Intelligence Analysts and Engineers in the development of information platforms and analytics tools to support business processes.

You will be expected to adhere to internal development lifecycle standards and to show a keen interest in improving your Java, JavaScript, Python and modern web development capabilities (JavaScript, HTML5, CSS) as well as working with industry standard software.

Your aim will be to help us meet the technical and medical information needs of our drug projects and financial teams. You should have practical experience in developing software and have a keen interest in understanding the science behind the drug commercialization process. At least one GCSE, AS or A-Level qualification in a life science would be an advantage but this is not essential.

Closing Date 28th November 2014
