Turn a productive internship into a rewarding career

- A path-way to convert your internship into a full-time opportunity at any one of the Infosys campuses in the UK

Join a strong network of 2,400+ InSteppers

- Build a global network of InStep Alumni, a platform that gives you the opportunity to connect with students from across the globe

Internship opportunities: Technical

Students with a technical background are offered an opportunity to work on real-time STEM Internship Projects in trending areas such as: AI, Big Data, Analytics, Machine Learning, Cyber Security, Machine Modernization, IT, IoT, Mobile Application Development

A truly unique experience

David García de Leaniz López,
University of Cambridge

During my internship, I worked with the Analytics unit to optimize the Machine Learning lifecycle. The best part of InStep, though, are the fellow interns who join us and made memories for a lifetime. Meeting them regularly for various activities and workshops has been the highlight of the internship. I would happily recommend the InStep experience, and encourage everyone to consider this unique internship experience which has left no stone unturned to make this virtual experience the best anyone could imagine.

A great learning opportunity

Ioana Drilea,
University of Twente

During my internship I worked on developing, facilitating and interpreting design thinking for an innovative tech department. After interpreting the creative results I worked on developing some of the solutions into lowfi prototypes. What I liked most about InStep are the learning opportunities and flexibility: you can truly tailor the internship to your needs! Because of this flexibility and learning opportunities I even joined an extra project where I learnt how to conceptualize and develop user interfaces for platforms. I would recommend the instep experience to everyone as it will challenge your views on what is possible and what you can achieve and learn.

About Infosys

Infosys is a global leader in next-generation digital services and consulting. We enable clients in 46 countries to navigate their digital transformation. With nearly four decades of experience in managing the systems and workings of global enterprises, we expertly steer our clients through their digital journey.
