

## What's inside?

Meet Summer the CEO internship Who Who are we looking for? are we? Our early talent matters Our mission What **Application** we do process Our early careers locations Stay in touch

Graduate scheme

NHS Digital is an organisation dedicated to delivering superb digital, data and technology services to the most extraordinary institution in the country: the NHS. If you work for us, you'll do work that matters.

You'll have an opportunity to change the world for the better every day of your working life. However demanding the work and however long the day, you will start and end it with your head held high. When you're assessing who to work for, these are the things that really count.

We know that the first few years of your working life are precious. It's the time when you learn how to apply all your academic knowledge to the messy real world. It's the time when you discover how much you need your team to be a successful individual. It's the time when you start to understand just how much you are capable of and the huge impact that you can have. We are committed to making these first couple of years richly rewarding and educational, in every sense.

**Sarah Wilkinson** 

**CEO** 

#### Who are we?

We're the national information and technology partner to the health and social care system.

Our technology is transforming the NHS and social care.

We're **passionate** about technology and public service

We take pride in our expertise that puts us at the forefront of public care

Our leaders are visible, visionary and prioritise wellbeing

We **collaborate** and **problem solve** across boundaries

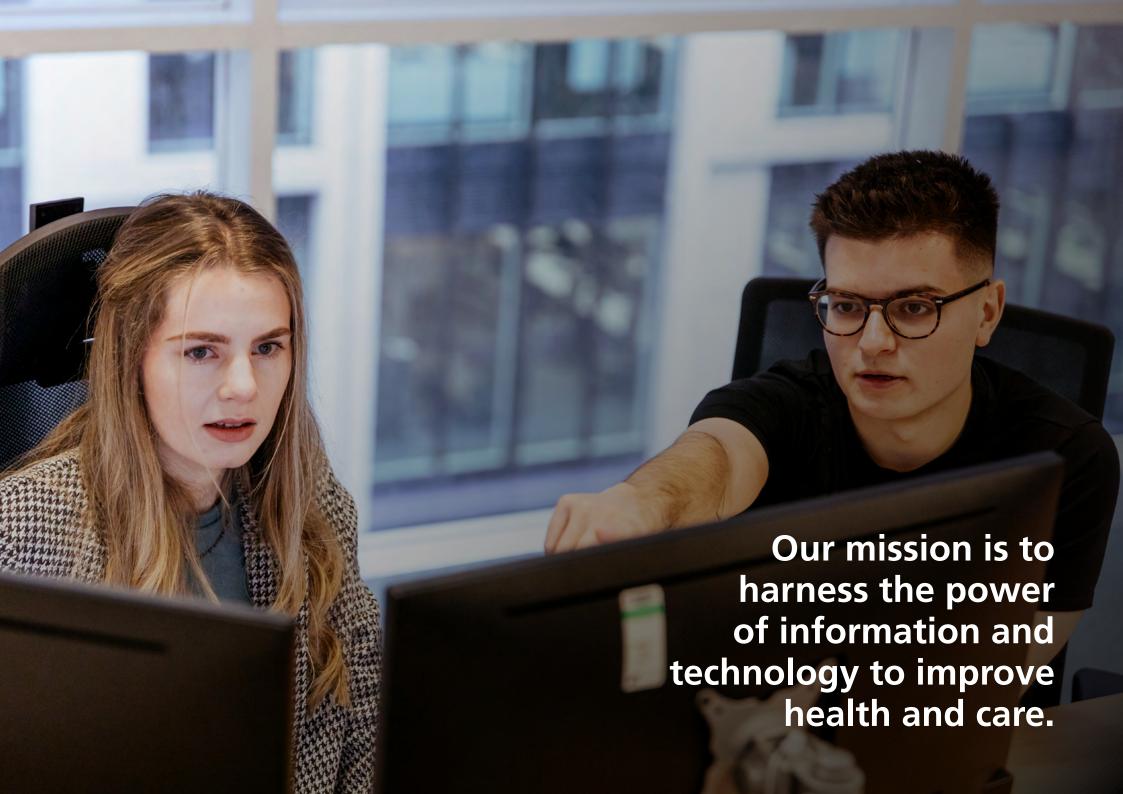

We **embrace change**, with a rigorous focus on **excellence** 

Our high-performing teams are **diverse and** inclusive

Our great minds allow us to be innovative and **forward-thinking** 

## What we do

We **design and build** digital products and systems

We **collect, curate and analyse** the huge amount
of data in the NHS

We build **national IT platforms** and infrastructure that all parts of the NHS need to operate

We run all these systems, every day, to an **extraordinary level of reliability** 

We are the **cyber security partner** to the healthcare sector

#### What we do

#### We make a difference, every day

400 alerts sent every day to highlight when children on protection plans come into hospitals

#### We're often your first point of contact with NHS care

The NHS website, NHS 111, NHS 111 online, and most 999 centres run on our content and algorithms

#### The security of our systems is exceptional

21m malicious threats a month are blocked by NHS Digital Cyber Security Operations System

#### Nearly all NHS staff rely on our services to do their job

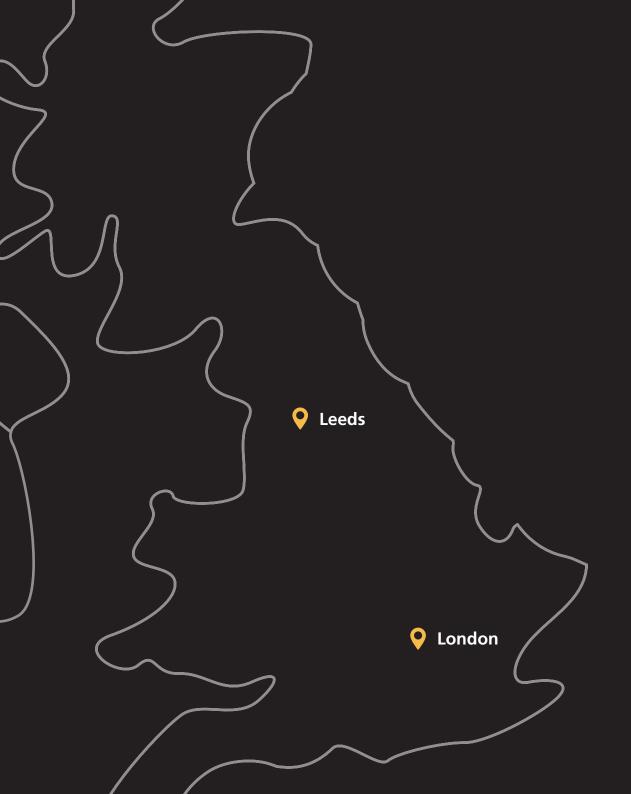

1.4m transactions on the Spine, the NHS's secure network, every hour

66

Since joining NHS Digital I've learnt to code in several different languages which enables me to analyse the huge amount of healthcare data we collect.

Tasha, Graduate Trainee

# Our early careers locations

We are an organisation of over 3000 people passionate about creating digital health and social care services and solutions. Our graduates and interns are based across our Leeds HQ and Skipton House in London. From 2021, we'll also be expanding our early careers locations into the new government digital hub in Leeds.

#### Join us as a

### **Graduate**

Our NHS Digital Graduate Scheme is a two-year unique multidisciplinary programme, teaming you with experts in the essential digital health skills and knowledge that drive NHS Digital's mission.

As an NHS Digital graduate, you'll work on critical projects that are shaping the future of health tech and utilising technology and data to enable better healthcare for our customers.

We're looking for people have (or be expecting) a 2:1 undergraduate degree in computer science or maths (or a closely related subject) or a Master's degree within a relevant field.

Location will be Leeds or London, dependent on assignment.

#### You'll rotate through areas including:

**IT** Operations

**Data Services** 

Platforms and Infrastructure

Product Development

Cyber Security

Wherever you are, you will be doing something that matters.

Join us as a

### **Summer Intern**

Our Summer Internship will offer you insight into the meaningful work we achieve.

You will have the opportunity to experience a variety of core areas within NHS Digital. It will be a taste of what's to come in our Graduate Scheme, but also provides valuable work experience to support any future employment endeavours.

We're looking for people in their penultimate year of study who are on track for a 2:1 undergraduate degree in computer science or maths (or a closely related subject).

Location will be Leeds or London, dependent on assignment.

The internship will cover a range of disciplines, including:

**IT Operations** 

**Data Services** 

Platforms and Infrastructure

Product Development

**Cyber Security** 

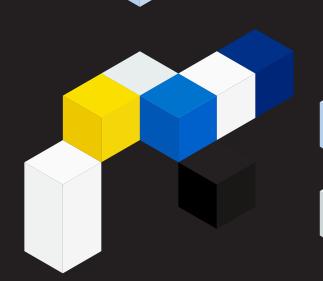

It can also be a fast track route to our Graduate Scheme.

66

The coronavirus work was intense but immensely rewarding. Whatever you contribute affects people, and you can use that as a source of motivation for wanting to do better, chase leads and work that little bit extra.

**Tosin, Graduate Trainee** 

## Who are we looking for?

Above all, we look for people motivated to contribute to the meaningful work of the NHS. People who believe in the power of technology to improve lives.

To do this, you need a creative and curious mind. You need to be able to adapt with constant change, and adjust your priorities accordingly. To respond to new technologies, you will need to continuously learn and challenge your own - and our - expectations.

- **01** 2:1 degree in Computer Science or Maths (or a closely related field) or a Masters within a relative field
- **02** Flexible and adaptable in an ever evolving environment
- **O3** Pragmatic problem solvers with a curious approach to their work
- **04** Passionate about improving the lives of others through data and technology
- **05** Ability to work efficiently and effectively in a multidisciplinary team

## Our early talent matters

#### What you'll get in return:

A competitive salary

A flexible approach to working

Annual leave starting at 27 days per annum plus bank holidays

An excellent contributory pension scheme

#### And...

A strong portfolio of experience delivering with multidisciplinary agile teams

Real commitment to personal and professional development

The chance to be part of a strong early talent community that support each other as they progress and develop

A vibrant, connected and collaborative range of diversity and inclusion staff networks

# Thinking of applying?

Our application process is just three stages.

**Step 1: Apply online** 

Fill in our application form, answer a few questions, and submit your CV.

Step 2: We'll be in touch

If you look like a good fit, we'll get in touch to talk through your interest in the scheme, and what skills and <a href="mailto:experience">experience</a> you can bring.

**Step 3: Assessment centre** 

If you're what we're looking for, you'll be invited to an assessment centre. Here you'll do individual and group tasks, and meet some of the people from our business. After the assessment centre, we'll notify the successful candidates.
