# Associate Cyber Security Analyst

## About Aspire

At Aspire Technology Solutions, we look for dynamic individuals who want to work for one of the fastest growing IT and Cyber Security providers in the UK. It is an exciting time to join us on our journey as we grow and expand!

*Our mission: To deliver technology like no other!*

## About the role

We are looking for an Associate Cyber Security Analyst who will work in our 24x7 SOC team. The successful candidate will be responsible for supporting key day-to-day operations of our Security Operations Centre. This role is varied to support your continuous development and will include security alert investigation, vulnerability reporting, carrying out support tasks and engaging with third parties. You will also be supporting the incident response team to deliver on smaller sub-tasks during nightshifts related to Digital Forensics, Malware Analysis, Threat Intelligence.

## Learning and development

This role is most suitable for recent graduates. You will be joining our already established SOC team with clear & exciting progression routes spanning Digital Forensics and Incident Response (DFIR), Pentesting, and SecOps. You will have exposure to the latest tools and vendors in the industry to continue your development, with training paths and a personal development plan to guide you through your introduction to cyber security.

## What you will be doing

- Triage of security alerts, following a playbook-based approach to take first steps towards investigation.
- Investigating and remediating support requests that come into the SOC.
- Support of SOC onboarding and installation projects.
- Monitoring SIEM platform health.
- Creation of vulnerability scanning reports.
- Responding to customer requests.

## You will suit the role if you have

- The ability to think analytically and solve complex problems as part of everyday security operations work.
- The ability to deliver and document security processes and procedures.
- Self-motivated, driven and curious mindset.
- The ability to work with multiple teams across the business, including IT teams, Operations, Projects, Service desk etc.

It is a great opportunity to build on your skillset. Ideally, you'll be educated to a degree level, with a degree in the relevant field and possess a keen interest in cyber-security.
