What to Expect

Our Graduate programme is a 12-18 month hands-on training, where you will work on client projects from day one, gaining exposure to genuine project scenarios and technologies.

You will receive practical, hands-on training in leading-edge technologies, and can fully certify in one or more technology disciplines of your choice, such as Tableau, Power BI, Python, Alteryx, Snowflake, AWS, Azure, or GCP. We will also train you in the technology-agnostic processes and methodologies required to work in data analytics, with industry-recognized certifications provided where necessary.

Benefits

- ✔ Funded Qualifications & Certifications
- ✔ Generous Holidays
- ✔ Flexible Working
- ✔ Health Insurance
- ✔ Free Sports Tickets
- ✔ Monthly Company Social Events
