

CANCER RESEARCH UK CENTRE FOR DRUG DEVELOPMENT SEMINARS 2019

Manufacture

Developing drugs in collaboration with CRUK's Centre for Drug Development

Having helped academics take 100+ projects from benchside to Phase I clinical trial the CDD can offer you the bespoke support needed to give your research the best chance of making it into the clinic.

Preclinical

We can support you to take your small molecule or biotherapeutic from preclinical candidate into a Phase I clinical trial.

This includes support developing your:

- Preclinical strategy
- CTA-enabling studies
(toxicology, PK & PD assay development)
- Manufacturing strategy and process
(biotherapeutics and small molecules)
- Phase I/IIa clinical trial from protocol development
right through to trial close

Clinical

Join us to explore the support available to help you translate your research into the clinic. We will be hosting additional seminars at Southampton, Beatson, UCL, Edinburgh, Birmingham, KCL, Barts, Manchester and ICR.

Find out more at CDDseminars.eventbrite.co.uk.

13 March | 14:00 –17:00
