

Open Day 2016 13th July

Come meet the scientists and learn about state-of-the-art research at the Institute of Genetic Medicine!

We would like to invite schools across the North East to participate in our *“Bench to bedside”* Open Day specifically tailored for the A-level students. During this popular event the students will hear about most recent genetic research, meet the patients and scientists, engage in fascinating debates and perform hands on experiments at the research tables. They will also have an opportunity to learn about careers in science and to chat to our students and careers advisors.

This event is **FREE** to attend, with limited availability, please register to attend.
