

My Skills

Many programmes have a set of standards, or skills. Students need to demonstrate and show evidence they have met these standards. The My Skills area allows students to manage the professional standards they subscribe to and the relevant evidence.

Graduate Skills Framework

Students are automatically subscribed to the Graduate Skills Framework. This framework “provides the opportunities for students to acquire the following learning, working and life values:

- Enable personal goals and aspirations to be met through self-directed continuous learning
- Apply a can-do attitude to taking calculated risks and challenging personal boundaries
- Create and cultivate cross-cultural relationships to develop knowledge, skills, understanding and opportunity”

This is underpinned with a set of skills and competencies that make up the Graduate Skills Framework.

Subscribing to a skill set

To subscribe to a skill set, go to the My Skills section from the home page. In the box on the left hand side, select Subscribe to a set.

On the next page, you will see the range of different skill sets. Use the search box to search for the relevant skill set.

When you have found the correct set, select the subscribe button to the right of the name of the set.

Creating a custom skill set

To create a skill set, go to the My Skills section from the home page. In the box on the left hand side, select Add a new Set .

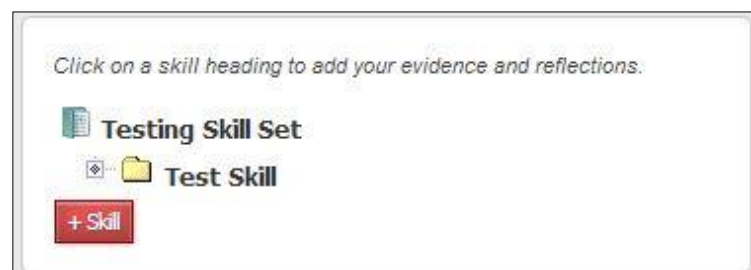

On the next page, add the title and a description of the set.

A screenshot of a web form titled 'Add a Skill'. Below the title is a light blue information box with an 'i' icon and the text: 'This will be added to the root of the Skill Set. This skill will only be visible to you.' Below this are two input fields: 'Title' and 'Description'. The 'Description' field has a small '150' character limit indicator and a checkmark icon. At the bottom left of the form is a red 'Add Skill' button. A close button (x) is in the bottom right corner of the form's container.

Select 'add skill' to build up your list of competencies.

To create a folder, add the folder name as you would a skill.

Click on this folder name before adding more competencies.

Once you have built your skill set, contact NU Servicedesk to make this 'live' so your students can subscribe to it.
