

# Copying content between Blackboard modules

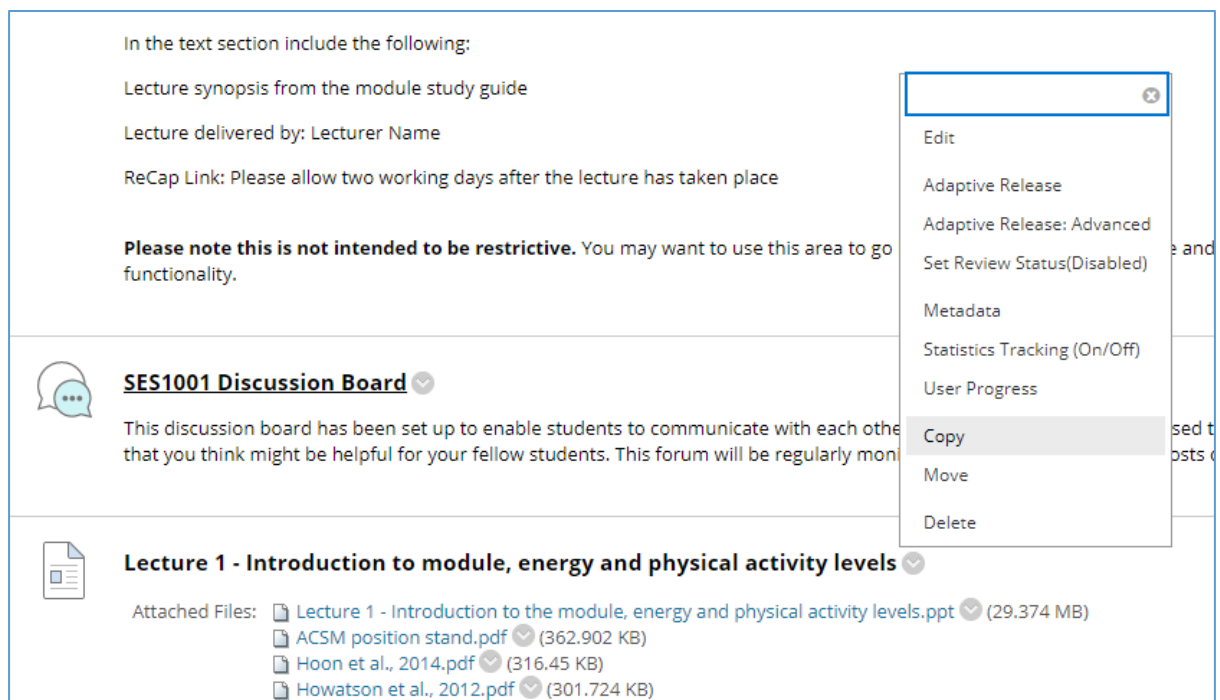

Now that a template has been applied to your modules for 2018/19, we are unable to do an automatic rollover of content in the first year of adoption as the module menu items do not match.

1

Go to the 17/18 module, and locate the content you wish to copy.

2

Click on the arrow next to the item you wish to copy and choose Copy from the menu that appears.

The screenshot shows a Blackboard content area with three sections. The first section contains text instructions. The second section is a discussion board titled 'SES1001 Discussion Board'. The third section is a file area titled 'Lecture 1 - Introduction to module, energy and physical activity levels'. A context menu is open over the file area, listing options: Edit, Adaptive Release, Adaptive Release: Advanced, Set Review Status(Disabled), Metadata, Statistics Tracking (On/Off), User Progress, Copy (highlighted), Move, and Delete.

In the text section include the following:

Lecture synopsis from the module study guide

Lecture delivered by: Lecturer Name

ReCap Link: Please allow two working days after the lecture has taken place

**Please note this is not intended to be restrictive.** You may want to use this area to go to functionality.

**SES1001 Discussion Board**

This discussion board has been set up to enable students to communicate with each other that you think might be helpful for your fellow students. This forum will be regularly monitored

**Lecture 1 - Introduction to module, energy and physical activity levels**

Attached Files:

- Lecture 1 - Introduction to the module, energy and physical activity levels.ppt (29.374 MB)
- ACSM position stand.pdf (362.902 KB)
- Hoon et al., 2014.pdf (316.45 KB)
- Howatson et al., 2012.pdf (301.724 KB)

# 3

Choose the module that you want to copy the content over to by clicking on the arrow next to destination course. Then click **Browse** and choose the destination folder within the module.

**CONTENT INFORMATION**

Name Lecture 1 - Introduction to module, energy and physical activity levels
